

aks-memoplot RV

Viscoelastic soft supporting mattress for decubitus prophylaxis and therapy

The anti-decubitus mattress represents particularly good value for money. With the advantages of a viscoelastic lying surface and reinforcement around the edges as an aid to standing up.

The advantages of the aks-memopot RV

- especially good for cachectic patients and suitable for pain therapy
- lying surface made from soft, visco-elastic foam
- reinforced edge zone for stable sitting on the mattress edge and for easier transfer to the chair/wheelchair
- ergonomic cuts under the lying surface for pressure relief and reduction of the shear force
- the climate-control openings in the lying area improve the microclimate
- including an inkoair® mattress cover, flame retardant according to BS 7175 (Crib 5) and biocompatible according to ISO 10993-5
- delivery of mattresses: covered, vacuumed and rolled
- optional mattress extension 20 cm

Patient weight 40-140 kg

For decubitus prophylaxis and therapy support up to stage III (in accordance with EPUAP)
